

Utilities and Engineering Case Study

TEEMA is proud to be one of the premier staffing partners selected by this large public utility serving over four million customers in Canada's pacific west. In just a few years TEEMA's Client Manager and a dedicated team of recruiters have delivered over 75 specialized resources with quick turnaround.

## Challenge

- The Client had newly initiated a contract staffing program and was unsure of the outcome and struggling with finding a wide range of engineering and technical resources to support their projects.

## Solution

- TEEMA's dedicated Client Manager was quickly able to demonstrate the value of the relationship by presenting highly qualified, reliable candidates using TEEMA's extensive experience in the market and a vast network of contacts.

## Outcome

- To-date TEEMA has placed over 75 consultants and continues to be regarded as a go-to staffing solutions provider.

## Sampling of Roles Filled:

- Distribution Engineers
- Transmission Line Engineers
- Substation Design Engineers
- Equipment and Maintenance Engineers (Mechanical / Electrical)
- Geotechnical / Geohazard Engineers
